

MISSOURI DEPARTMENT OF TRANSPORTATION

Route 40 & Route N Ribbon Cutting Ceremony

Project Details:

- ✓ Awarded to Fred Weber Inc. for \$26 million
- ✓ This Route 40 and Route N project constructed a fully functional interchange that eliminates at-grade crossings at Route N to allow greater flow and safety on Route 40 and Route N.
- ✓ Many of the improvements include improved access to local roads and business developments which will strengthen the economic growth on the Route 40 corridor.
- ✓ With the interchange opening, the contractor can continue constructing new eastbound and westbound lanes of Route 40 where the signalized intersection was located. The entire project will be completed by late Spring of 2006.
- ✓ Before construction began, more than 12,000 cars a day used Route N to access Route 40. Route 40 has an average of 100,000 vehicles traveling on it daily.
- ✓ The improvement project began in summer 2003.
